

FAREETIKET EFTER CLP

I perioden frem til 1. juni 2017 vil alle fareetiketter på kemiske produkter skifte udseende. Faremærkningen på etiketten skrifter fra de orange faresymboler til farepictogrammer, som har form som en rombe. De nye farepictogrammer ligner dem man kender fra transport af farligt gods, men der er kommet nogle nye symboler til.

Fareetiketten indeholder oplysninger om:

- Handelsnavn
- Leverandørens/producentens/importørens navn, adresse og telefonnummer
- Mængde
- Indholdsstoffer, som giver anledning til fareklassificeringen
- Farepictogrammer
- Signalord enten Fare eller Advarsel (Fare angiver den største risiko)
- H-sætninger (H står for Hazard)
- P-sætninger (P står for Precautionary)
- EUH-sætning (Særlig EU sætninger)

Kodenummeret bør også være på etiketten, hvis det er en maling, rensmiddel, klæbemiddel, affedtning eller fortynder. Hvis kodenummeret ikke står på etiketten, skal leverandøren oplyse det skriftligt på anden måde fx i sikkerhedsdatabladet.

H-sætninger fortæller om de umiddelbare risici, der er ved arbejdet med produktet. P-Sætningerne siger hvilke generelle sikkerhedsforanstaltninger man skal tage, både når man arbejder med produktet og ved uheld, herunder beskrivelse af førstehjælpeforanstaltninger..

Ved omhældning skal man ALTID kopiere fareetiketten over på den nye beholder, så man kan se, hvad der er i beholderen, og hvilke forholdsregler der skal tages i tilfælde af uheld.

<p style="text-align: center;">HEMPEL'S THINNER 08080</p>  <p style="text-align: center;">Danger Contains: solvent naphtha (petroleum), light arom..</p> <p><small> OEL: Flammable liquid and vapor. Causes skin irritation. Causes eye irritation. May be fatal if inhaled and enters lungs. May cause respiratory irritation. Toxic to aquatic life with long lasting effects. </small></p> <p><small> Avoid contact with skin. Wear protective gloves. Wear eye protection. Keep away from heat sources such as heat pipes/open flame. No smoking. Use explosion-proof electrical/ventilating/equipment. Use only non-sparking tools. Take precautionary measures against static discharges. Keep container tightly closed. Use only outdoors or in well-ventilated areas. Avoid exposure to the environment. Keep out of reach of children. Avoid breathing dust. Wash thoroughly after handling. If medical advice is required, have product container or label at hand. </small></p> <p><small> GHS07: Corrosive. Hazardous to the environment. Contains: solvent naphtha (petroleum), light arom.. </small></p> <p><small> H228: Flammable liquid. H314: Causes skin irritation. H332: Harmful if inhaled. H336: May cause drowsiness or dizziness. P201: Read the label carefully. P202: Do not handle until you have read the label. P231: Keep container tightly closed. P232: Keep this and all other containers upright. P240: Avoid heat sources. P241: Avoid contact with hot surfaces. P242: Avoid contact with fire. P243: Avoid contact with flames. P251: Do not breathe vapors/mist. P253: Wash thoroughly after handling. P261: Avoid breathing dust/fume/gas/mist/vapors/spray. P273: Do not release into the environment. P280: Wear protective gloves/eye protection/face protection. P281: Use eye protection. ---	---

Etiketten skal suppleres med yderligere information om produktets farlighed.
Leverandøren/Producenten skal medlevere et sikkerhedsdatablad og evt. et eller flere eksponeringsscenarier. Derudover skal der udarbejdes en arbejdspladsbrugsanvisning, der fortæller hvordan man skal arbejde med produktet om bord.

Lovgivningen står i EU Forordning nr. 1272/2008 om klassificering, mærkning og emballering af stoffer og blandinger (CLP), som du kan finde på www.mst.dk.
